Kiran Nayak

University Talent Partner

Adobe

Lehi, Utah, United States of America

Dear Kiran,

I am writing to express my interest in the Software Engineering position at Adobe, as advertised. My name is Daniel Josué Mulenda, and I am currently a senior at the Georgia Institute of Technology majoring in Computer Science projecting to graduate on December 16th, 2023.

Having come across the job description, I was immediately drawn to the opportunity to contribute to a dynamic team focused on developing high-performance, reliable, and maintainable code. My academic journey, particularly my experiences as an Undergraduate Researcher and Project Manager at Georgia Tech, has equipped me with a robust foundation in software development. During my time as a Back-end Developer, I conducted correlation analysis and developed APIs using Flask and Heroku, demonstrating my ability to contribute to various aspects of the development lifecycle.

In my Software Engineering Internship with Congo Coders, I participated in on-site testing and developed APIs using Spring Boot and MySQL. These experiences, coupled with my proficiency in Java and Python, align with your requirement for someone proficient in programming languages which further contribute to my ability to meet the demands of the role.

One of my strengths lies in collaboration and communication. As a Project Manager, I successfully led a team, fostering a positive and productive environment. I am eager to bring this collaborative spirit to Adobe, contributing to the team's growth and success.

Enclosed with this letter is my resume, providing more details about my education, experiences, and skills. I am enthusiastic about the opportunity to discuss how my background and skills align with the needs of Adobe. I am confident that my technical proficiency, problem-solving skills, and passion for software engineering excellence make me a strong fit for this role.

Thank you for considering my application. I look forward to the possibility of discussing my candidacy in further detail. Please find my contact information below.

Sincerely,

Daniel J. Mulenda

The Job:

Our Company

Changing the world through digital experiences is what Adobe's all about. We give everyone—from emerging artists to global brands—everything they need to design and deliver exceptional digital experiences! We're passionate about empowering people to create beautiful and powerful images, videos, and apps, and transform how companies interact with customers across every screen.

We're on a mission to hire the very best and are committed to creating exceptional employee experiences where everyone is respected and has access to equal opportunity. We realize that new ideas can come from everywhere in the organization, and we know the next big idea could be yours!

The Opportunity

Adobe is seeking talented and passionate Software Engineer across all organizations to help plan, design, develop, and test software systems or applications for software enhancements and new products used in local, networked, cloud-based or Internet-related computer programs and products.

What You'll Do

- Develop high-performance, reliable, testable and maintainable code.

- Participating in all aspects of software development activities, including design, coding, code review, testing, bug fixing, and code/API documentation.
- Collaborate with engineers and participate in daily or weekly stand ups and meetings.
- Grow with the support of your team and help others on the team grow by providing thoughtful feedback and uplifting those around you.
- Work both independently and collaboratively within a fast-paced development team, with clear, positive, and constructive communication.
- Additional responsibilities as needed based on specific role or team

What You Need to Succeed

- Bachelor's or Master's in Computer Science, Computer Engineering, Electrical Engineer, or equivalent experience required
- 0-1 + years of experience in specific skill/field(s)
- Proficient in programming languages such as Python, Java, C++ etc.
- Strong technical background with analytical and problem-solving skills
- Strong knowledge in Java or JavaScript and at least one other language like Python, C#, Ruby, PHP.
- Familiarity with client-side frameworks and libraries like React, Vue, Angular, jQuery.
- Excellent problem solving and debugging skills, and direct experience with DevOps in a SaaS environment is a plus.
- Customer focused and have real passion for quality and engineering excellence at scale.
- Excellent communication and collaboration skills.

Our compensation reflects the cost of labor across several U.S. geographic markets, and we pay differently based on those defined markets. The U.S. pay range for this position is $92,100 -- $161,000 annually. Pay within this range varies by work location and may also depend on job-related knowledge, skills, and experience. Your recruiter can share more about the specific salary range for the job location during the hiring process.

At Adobe, for sales roles starting salaries are expressed as total target compensation (TTC = base + commission), and short-term incentives are in the form of sales commission plans. Non-sales roles starting salaries are expressed as base salary and short-term incentives are in the form of the Annual Incentive Plan (AIP).

In addition, certain roles may be eligible for long-term incentives in the form of a new hire equity award.

Adobe is proud to be an Equal Employment Opportunity and affirmative action employer. We do not discriminate based on gender, race or color, ethnicity or national origin, age, disability, religion, sexual orientation, gender identity or expression, veteran status, or any other applicable characteristics protected by law.
